

Range of application

- Leveling coating for concrete suitable for pedestrians and rolling traffic or cement screed
- Filled as reaction resin screed according to DIN EN 13813

Properties

- Epoxy-based coating
- High toughness
- Self-leveling coating
- Resistant to mechanical stress
- Abrasion resistant (high wear resistance)
- High chemical resistance
- Total solid*

Test certificates

- Declaration of performance in accordance with the Construction Products Regulation (system 4)
- Environmental Product Declaration (EPD)
- List of chemical resistance

Epoxy Coating Systems – Coatings

WEBAC® 4430

Technical data	Values		
Mixing ratio	4 : 1 parts by weight		
Density, 20 °C (DIN ISO 2811)	Comp. A Comp. B	≈ 1.5 g/cm ³ ≈ 1.0 g/cm ³	
Bulk density	≈ 1.5 g/cm ³		
Pot life (WEBAC test specification based on DIN ISO 9514)	at immediate spreading on coating area	20 °C ≈ 40 min	12 °C ≈ 45 min
	in container	20 °C ≈ 20 min	12 °C ≈ 30 min
Application temperature Building structure and material	> 12 °C		
Adhesive strength on concrete 7 d, 21 °C, dry (DIN EN 1542)	dry	without priming ≈ 3.5 MPa (N/mm ²)	with priming > 4 MPa (N/mm ²)
Compressive strength 7 d, 21 °C (DIN ISO 604)	≈ 55 MPa (N/mm ²)		
Bending tensile strength 7 d, 21 °C (DIN ISO 178)	≈ 54 MPa (N/mm ²)		
Tensile strength • Elongation at break 7 d, 21 °C (DIN ISO 527)	≈ 20 MPa (N/mm ²) • ≈ 5%		
E modulus 7 d, 21 °C (DIN ISO 527)	≈ 3,900 MPa (N/mm ²)		
Shore hardness D 7 d, 21 °C (DIN EN 868)	≈ 80/75		
CE classification (DIN EN 13813)	SR - B2.0 - AR0.5 - IR4		
Fire behavior (DIN 4102-4, 2.3.2)	B2		
GISCODE	RE30		
EPD	EPD-DBC-20220176-IBF1-EN		
Exposure scenarios according to REACH	Assessment of industry standard application		

The specified data are values determined under laboratory conditions and are subject to a certain fluctuation. Deviations are possible in practice depending on the respective object situation.

Epoxy Coating Systems – Coatings

WEBAC® 4430 CE

Preparatory work

Structural analysis:

- Checking the substrate
 - Moisture condition (dry, damp or wet)
 - Surface strength (> 1.5 MPa (N/mm²))
 - Concrete quality
 - Condition of the surface (dirty, oily)
- Observe dew point

This results in:

- Selection of suitable material
- Pre-treatment of the substrate if necessary

The substrate must be open-pored, dry and free of dust and oil; if necessary, pre-treat the substrate.

Application instruction

- Application by blade, trowel or serrated trowel
- The mixture must be used completely within pot life
- Only use pure WEBAC material without any residues of cleaning agents or other impurity
- The pot life/curing time are influenced by the amount of material/layer thickness and the temperature of the material/building structure – higher temperatures accelerate, lower temperatures slow down the reaction
- Observe Dew Point Table (the substrate temperature must be 3 °C above dew point temperature to avoid condensation)

Mixing

- Briefly stir component A. Add component B to the container of component A (make sure that the containers are completely empty) and mix homogeneously at least for 2 min (streak-free)
- Transfer mixed material to another clean mixing vessel and stir briefly

Application

- Apply the coating to the primed surface at the desired layer thickness by blade, trowel or serrated trowel immediately after mixing and vent with a porcupine roller

Final work and cleaning

- Clean the equipment with **WEBAC. Cleaner A**
- Never use **WEBAC. Cleaner A** for diluting products; avoid mixing with the coating material
- Use **WEBAC. Cleaner B** for dissolving cured material
- Observe the technical data sheets of the cleaners used

Technical Information

All the data indicated in this technical data sheet and any related information provided by our employees are of an advisory nature representing our current state of knowledge and in no way binding. As the exact chemical, technical and physical conditions of the actual application are beyond WEBAC's control, this information does not preclude examination of the products and/or procedures for the intended application and surface by the user. WEBAC is thus unable to guarantee results. The user is fully responsible for the observation of existing regulations and conditions when using the products.

Epoxy Coating Systems – Coatings

WEBAC® 4430 CE

Product data

Material consumption
depending on the substrate's
absorbency

≈ 1.5 kg/m² per 1 mm layer thickness

Delivery form

Comp. A

Comp. B

24 kg

6 kg

12 kg

3 kg

Storage

- Between 5 °C and 30 °C
- Protected from moisture
- In original, sealed containers

Compatibility

- Compatible with masonry mortar, concrete, steel, foil, cable sheathing, metal and WEBAC injection materials

Resistance

- Resistant to diluted acids and alkalis, lubricants, oil and fuels

Occupational safety

The safety regulations of the industrial trade associations and the WEBAC Safety Data Sheets are to be observed at all times when working with this product. Safety data sheets according to Regulation (EC) No. 1907/2006 (REACH) must be accessible to all persons responsible for occupational safety, health protection and the handling of materials. For further information, please see the separate information sheet "Occupational Safety" in our product catalog or www.webac.de.

Waste disposal

In Germany, empty containers can be disposed of via "Interzero Circular Solutions Germany GmbH" observing the respective terms and conditions. It is not possible to dispose of containers at production facilities or delivery warehouses. For more detailed information, please see the separate information sheet "Disposal Notes" in our product catalog or www.webac.de and the safety data sheets.
